**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A handheld mobile image sensing and printing device that comprises
  - a support structure;
  - a color image sensor positioned on the support structure for sensing a color image;
  - a color printing mechanism that is positioned on the support structure and operatively connected to the image sensor to print the image sensed by the image sensor; and
  - a remote communications arrangement positioned on the support structure and operatively connected to the image sensor to transmit data representing the image and to receive data representing images to be printed by the printing mechanism;  
wherein the printing mechanism includes a pagewidth printer and processing circuitry to control operation of the printer.
2. (Original) An image-sensing device as claimed in claim 1, in which the image sensor is in the form of a camera device capable of storing images on demand.
3. (Cancelled).
4. (Currently Amended) An image sensing device as claimed in claim 3~~1~~, in which the printer includes a pagewidth printhead and an ink distribution unit that is positioned on the printhead to supply ink to the printhead.
5. (Original) An image sensing device as claimed in claim 4, which includes a print media feed mechanism for feeding print media relative to the printhead so that a printing operation can be carried out on the print media.
6. (Original) An image-sensing device as claimed in claim 1, in which the remote communications arrangement is configured to transmit and receive radio signals.
